

## APPENDIX

Claim 1 has been amended as follows:

1. (Twice Amended) A method comprising:  
enabling a processor-based system to difference a cached version and a current version of an Internet web page, said current version being provided directly by a web server;  
enabling the [a] system to indicate the difference between said cached and current versions; and  
providing a graphical user interface of a navigation bar with a subtract button image.

Claim 8 has been amended as follows:

8. (Twice Amended) An article comprising a medium for storing instructions that enable a processor-based system to:  
difference a cached version and a current version of an Internet web page, said Internet web page being provided directly by a web server;  
indicate the difference between said cached and current versions; and  
provide a graphical user interface of a navigation bar with a subtract button image.

Claim 15 has been amended as follows:

15. (Twice Amended) A system comprising:  
a processor;  
a storage coupled to said processor; and  
said storage storing instructions that enable the [a] processor-based system to difference a cached and a most current version of an Internet web page, said most current version being immediately received from a web server, indicate the difference between said cached and most current versions, and provide a graphical user interface of a navigation bar with a subtract button image.

Claim 21 has been amended as follows:

21. (Amended) A method comprising:

enabling a processor-based system to difference a cached version and a current version of an Internet web page, said current version being provided directly from a web server;  
and

indicating the difference between said cached and current versions by blanking the common material between the cached and the current versions.

Claim 22 has been amended as follows:

22. (Amended) An article comprising a medium storing an instruction that enables a processor-based system to:

difference a cached version and a most current version of an Internet web page available on a web server; and

indicate the difference between said cached and most current versions by blanking the common material between the cached and the current versions.

Claim 23 has been amended as follows:

23. (Amended) A system comprising:

a processor;

a storage coupled to said processor; and

said storage storing instructions that enable the processor to difference a cached and a current version of an Internet web page, said current version being provided directly from a web server, and indicate the difference [different] between said cached and current versions by blanking the common material between the cached and current versions.
